WHAT'S NEW & HOT IN BATHROOM TILES!!!!

LARGE RECTIFIED TILES

The newest trend in tiles is the seamless look called a rectified tile. A rectified tile is a tile that has had all its edges mechanically finished for a more precise facial dimension.

The rectified edge on the tiles allows you to get the tiles very close together without leaving a large grout joint. The rectified edge in a large format tile minimizes the amount of grout joints and gives you a beautiful streamlined look. Most popular are the larger size formats often used with smaller modular sizes to create patterns.

If you want a seamless look you must visit our tile gallery with plenty of rectified large tiles to choose from. The tile sizes seem to be getting bigger and bigger - we have tiles now that are 2' x 4'.

Our customers love the larger rectified tile and are very pleased with the end result.
